

Böttcherin FR-1000

Dampening Roller Cleaner

The dampening characteristics of modern continuous dampening units depend on the surface of the dampening rollers and on their cleanliness. Especially in alcohol reduced printing, there is an increased build up of ink on the dampening rollers which desensitizes their surfaces reducing their hydrophilic nature.

Böttcherin FR-1000 is a special wash for removal of ink build-up on dampening pan rollers or dampening metering rollers in continuous dampening systems.

- ◉ easily applicable because of user friendly 1-l-metal container
 - ◉ high ink dissolving power
 - ◉ no accumulation in the dampening water
 - ◉ non water miscible
 - ◉ fast evaporating
 - ◉ fast wetting of dampening rollers after cleaning
 - ◉ free of aromatics and of acetone
-

Depending on the degree of dirtying, the dampening rollers should be cleaned occasionally with Böttcherin FR-1000.

With the press stationary, apply Böttcherin FR-1000 with a cloth on the dampening rollers and wipe clean.

Wear protective gloves during application. Follow all press safety procedures.

Application

Features

Note

-  1 litre bottle
-  10 litre can

Package

Böttcherin FR-1000 is classified and marked in accordance with EC - Directive 1999/45/EC - in its latest version.
